imagine *your space*

*L'ufficio è quel luogo in cui idee, creatività, innovazione e successo prendono forma. Da qui siamo partiti a concepire **workspaces**, sistemi che rispondono in maniera integrata ed innovativa alle esigenze di benessere ed efficienza dei moderni spazi di lavoro.*

*Le bureau est le lieu où les idées, la créativité, l'innovation et le succès deviennent réels. À partir d'ici nous avons commencé à concevoir “**workspaces**”, des systèmes intégrés qui répondent aux besoins de bien-être et d'efficacité des espaces de travail modernes.*

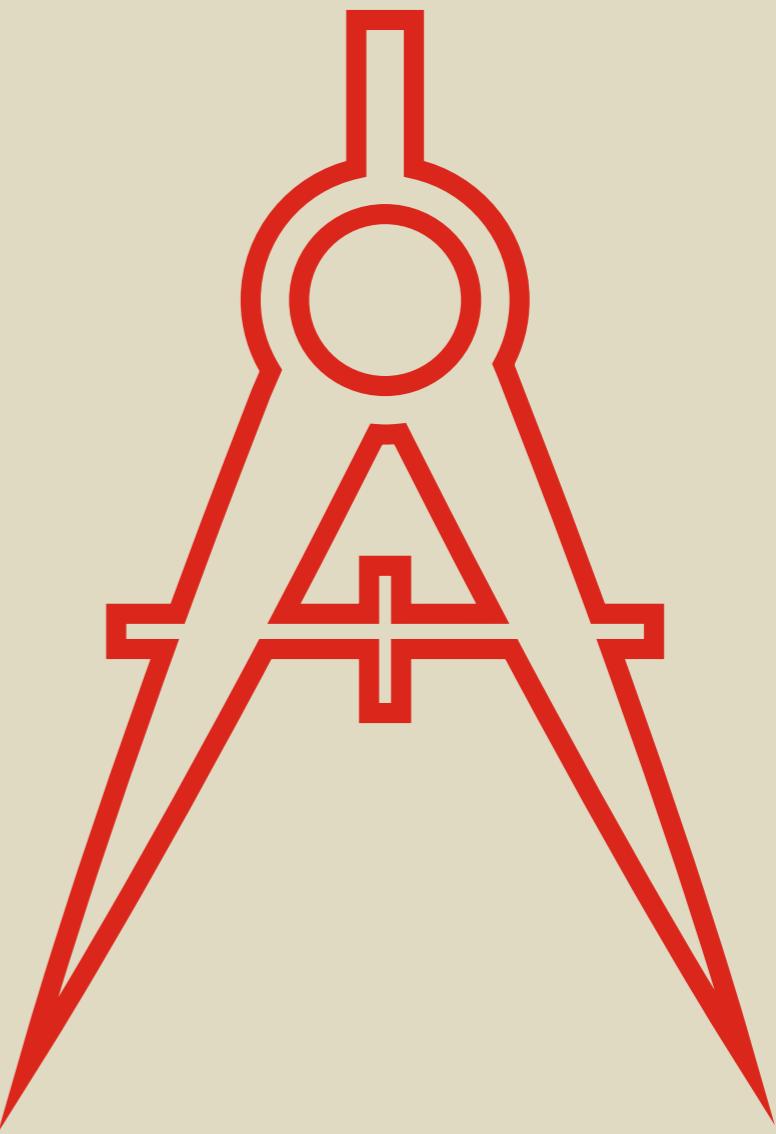

Office is the place where ideas, creativity, innovation and success become real. From here we started to concept **workspaces**, integrated systems that meet the needs of wellness and efficiency of modern working spaces.

THE HEART OF **pigreco**

Pigreco è un sistema ufficio altamente innovativo che rompe con gli schemi convenzionali, progettato per interpretare e vivere al meglio i luoghi di lavoro direzionali, operativi e meeting. L'elemento principale del sistema **Pigreco** è una struttura facile e veloce da montare, composta dalla identificativa gamba a cavalletto - disponibile in 2 finiture base: bianco o titanio, e in 6 colori laccati - e da una trave centrale attrezzabile per l'elettrificazione. La struttura di **Pigreco** è montabile a secco e per questo upgradabile e facilmente riconfigurabile.

Pigreco est un système de bureau très innovant qui rompt avec les systèmes conventionnels, conçu pour interpréter et vivre au mieux les lieux de travail directionnels, opératifs et de réunions. L'élément principal du système **Pigreco** est sa structure rapide et facile à assembler, composé par la base "à tréteau" - disponible en deux finitions: blanc ou titanio et en 6 couleurs laquées - et une poutre centrale qui peut être équipé pour l'électrification. L'assemblage de la structure de **Pigreco** est à sec et donc extensible et peut être facilement reconfiguré.

Pigreco is a highly innovative system that breaks the conventional schemes, designed to interpret and live the workplace in a best possible way being that executive, operational or meeting. The pricipal element of **Pigreco** system is the frame that has been designed so to be simple and easy to install. It is composed by its distinguished compass shape leg - available in 2 standard colours: white and titanio and in 6 optional lacquered colours - and by a central beam equippable for electrification. The **Pigreco** frame can be installed easily and for this reason it is upgradable and easy to reconfigure.

et pieds titano avec meuble structurel modulaire L. 400
P. 1600 mm (meuble ouvert, meuble 3 tiroirs et meuble
avec porte) laqué crema.

THE INNOVATION OF **pigreco***bench*

Innovative metal structure composed by a single central beam that allows a total span of 3600 mm without any central supporting element though guaranteeing proper strength and support. The structure allows wire management and cable riser through side legs with compass design. The base of the central beam provides support of the wire basket and frontal screens leaving the composition clean and essential. Desktops of 30 mm thickness complete the structural elements.

⌚ Span max 3600 mm

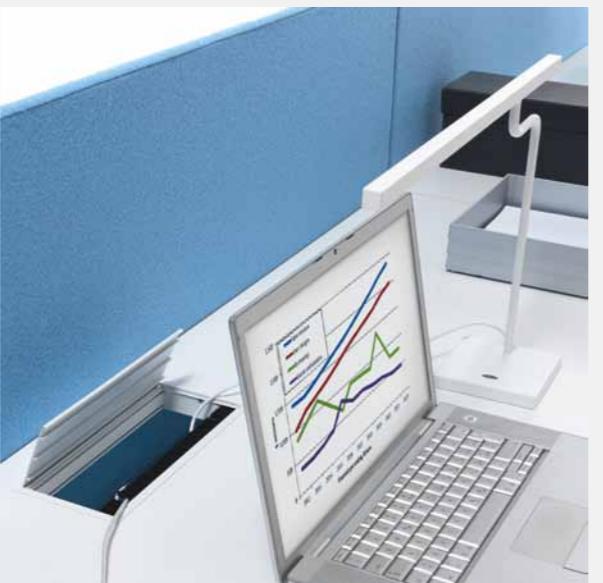

Struttura innovativa composta da un'unica trave metallica centrale che permette campate fino a 3600 mm senza ausilio di supporto centrale, garantendo stabilità e possibilità di gestire il cablaggio attraverso le gambe laterali a compasso. La base della trave centrale costituisce l'elemento di supporto per vaschette porta cavi e screen frontali, lasciando la composizione pulita ed essenziale. Piani scrivania da 30 mm completano gli elementi strutturali.

⌚ Campata massima 3600 mm

Structure composée par une poutre métallique centrale unique qui permet une portée totale de 3600 mm sans aucune élément de support central, garantissant stabilité et gestion du câblage à travers les pieds latéraux «à compas». La base de la poutre centrale fournit un support pour les bacs passe-câbles et les cloisonnettes frontaux, laissant la composition sobre et essentielle. Plateaux bureau de 30 mm complètent les éléments structurels.

⌚ Portée maximale de 3600 mm

smart & invisible WIRING

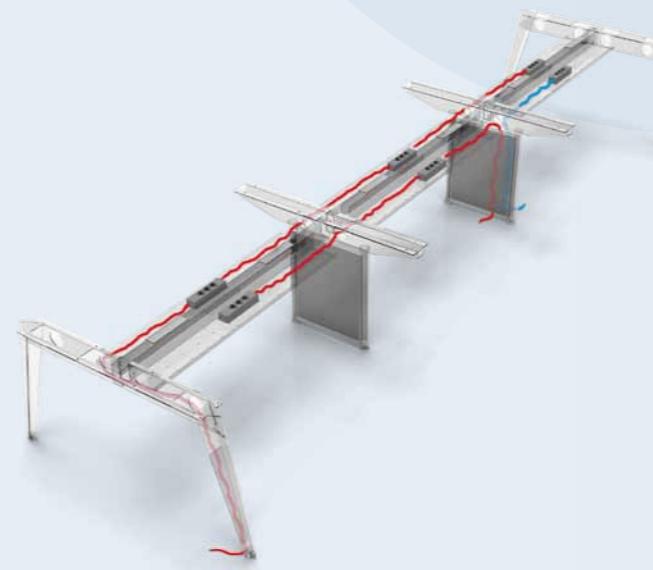

The Design Concept of **pigreco** worked on aesthetics but also on easy assembling and quick installation process that result particularly easy and intuitive.

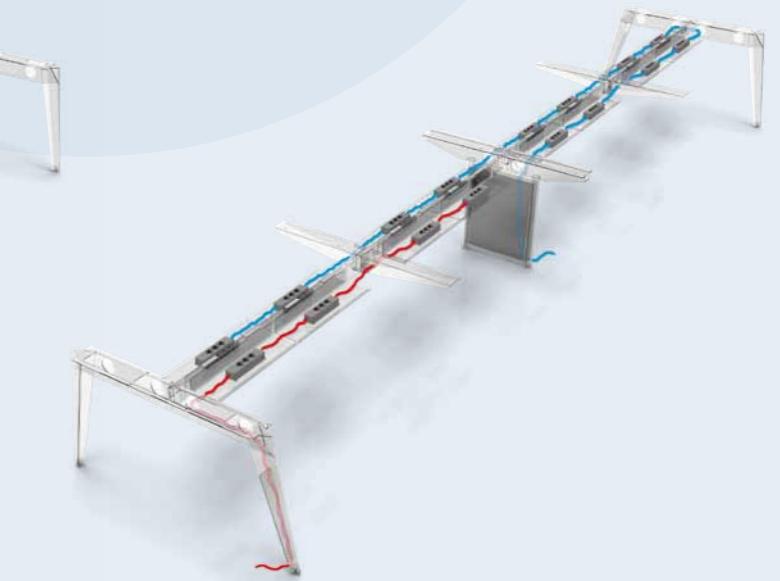

4 x

The cable management can be effected when the workstation is completely assembled. Cable rise can be made through side legs or through optional central tower upholstered in technical fabric. We highlight the maximum span of 3600 mm between the side legs and the possibility for the legs to be painted in two base colour finish, white and titanio or in optional 6 lacquered colours.

6 x

8 x

Il Concept Design di **pigreco** ha lavorato sull'estetica, ma anche sulla facilità di montaggio ed assemblaggio che risultano particolarmente semplici ed intuitivi. Il posizionamento dei cavi, che di solito viene eseguito a strutture semiallestite, interrompendo così il lavoro di assemblaggio, può essere effettuato, invece, a bench completamente montati. La salita cavi può avvenire lungo la gamba a compasso oppure tramite la gamba elettrificabile centrale rivestita in tessuto. Si evidenziano la luce massima tra le due gambe fino a 3600 mm e la disponibilità, per le gambe, di due finiture base bianco e titanio e in opzione di 6 colori laccati.

Le Concept Design de **pigreco** a travaillé sur l'esthétique, mais aussi sur la facilité d'installation et de montage qui sont particulièrement simples et intuitives. Le positionnement des câbles, qui a habituellement lieu à des structures partiellement montées en bloquant le travail de montage, peut être effectuée une fois le banc est complètement monté. La remontée des câbles peut passer par le pied «à compas» ou à travers le pied central électrifiable recouvert de tissu. En évidence le maximum de décalage entre les deux pieds aux extrémités allant jusqu'à 3600 mm et la disponibilité, pour les pieds de deux finitions de base blanc et titanio et en option de 6 couleurs de laques.

cable management

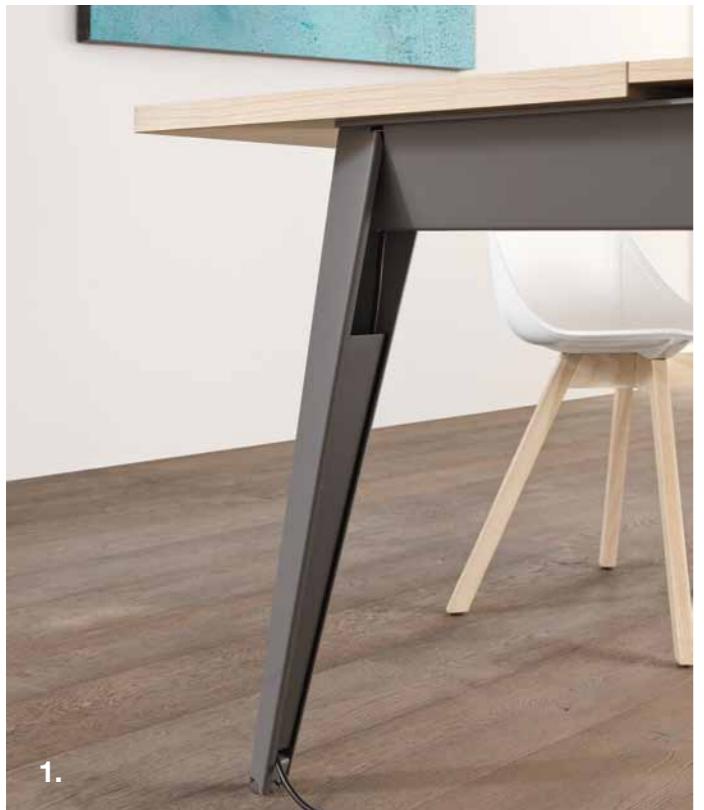

For the stand-alone desks there are different electrification solutions available: **1.** Cable rise through side leg with metal cover or through cable vertebra. **2.** Cable management through wire basket located under the table top. **3.** Ergonomic cable outlets that can be located on left, right or central position in the desktop.

Nelle scrivanie singole sono possibili diverse soluzioni di elettrificazione: **1.** Salita cavi su gamba con carter o tramite vertebra. **2.** Alloggiamento dei cavi sotto piano tramite vaschetta. **3.** Uscita cavi sul piano tramite sportelli ergonomici, posizionabili a dx, sx o al centro del piano.

Dans les bureaux individuels il y a plusieurs solutions d'électrification: **1.** Remontée câbles dans le pied avec cache ou par vertèbre. **2.** Logement des câbles sous plateau par goulotte. **3.** Sorties câbles sur le plan par trappes positionnés à droite, gauche ou au centre du plateau.

1. Cable raise through leg and leg cover. **2.** Central cable raiser (not structural) for composition of 4/8 pax for central floor box wire access. **3.** Central structural cable tower upholstered in technical fabric for compositions of 6/8 pax. **4.** On desk grommet white painted or lacquered. **5.** On desk flipper cable port.

Le revêtement en tissu (Cat. C-D-F) personnalise le produit et augmente le pouvoir phono-absorbant.

* Disponible seulement pour les projets

The “Central Spine Systems”, that are those systems provided with a central element to whom the desks are connected perpendicularly, are here represented by the program Vertebra (spine) with Pigreco or Yard (desk). The most evident advantage that this work solution offers consists in the possibility of obtaining a high level of privacy and a very comfortable access to filing and use the skirting of the central spine to wire manage the cluster without necessarily using raised floors.

I sistemi a “Spina Centrale”, ovvero quei sistemi dotati di un elemento centrale al quale le scrivanie sono agganciate perpendicolarmente, sono rappresentate dal programma Vertebra (spina) con Pigreco o Yard (scrivania). Il vantaggio più evidente che offre questa tipologia di lavoro è rappresentato dalla possibilità di ottenere un alto livello di privacy con un’archiviazione a portata di mano, e la possibilità di sfruttare lo zoccolo della spina centrale per l’alloggiamento dei cablaggi, senza ricorrere a pavimenti flottanti.

pigreco-yard & vertebra system

Les systèmes de «Spina Centrale», à savoir les systèmes avec un élément central auquel les bureaux sont accrochés perpendiculairement, sont représentés par le programme Vertèbra (spina) avec Pigreco ou Yard (bureau). L'avantage le plus évident qui offre ce type de poste de travail est représenté par la possibilité d'obtenir un niveau élevé de "privacy" avec l'archivage à portée de main, et la possibilité d'exploiter le socle du rangement central pour mettre le câblage, sans recourir à planchers flottants.

vertebra system

"Vertebra" double-sided for opposed workstations. On top of the "Vertebra" it has been fixed a screen panel of 30 mm thickness equipped with accessory rails for stationery and monitor arms that, other than improving the functionality, segregates the workspace and create privacy. The azzurro polvere color of the screen is linked to the legs of Pigreco desk. In the background Pod system.

"Vertebra" bifacciale per postazioni contrapposte. Sopra la "Vertebra" è stato posizionato uno screen sp. 30 mm con barre portaoggetti e portamonitor che, oltre a migliorare la funzionalità, suddivide lo spazio creando privacy. Il colore azzurro polvere dello screen è abbinato alle gambe delle scrivanie Pigreco. Sullo sfondo postazioni Pod.

Biface "Vertèbres" pour des positions contre-posées. Au-dessus de la "Vertèbre" a été placé un écran épaisseur 30 mm avec rails porte accessoires et porte-monitor qui en plus d'améliorer la fonctionnalité, divise l'espace et crée une privacy. La couleur de l'écran bleu poudre est couplé à les pieds des bureaux Pigreco. Dans les stations de fond: Pod.

Les câbles passent le long du socle et sortent par le trou passe-câbles.

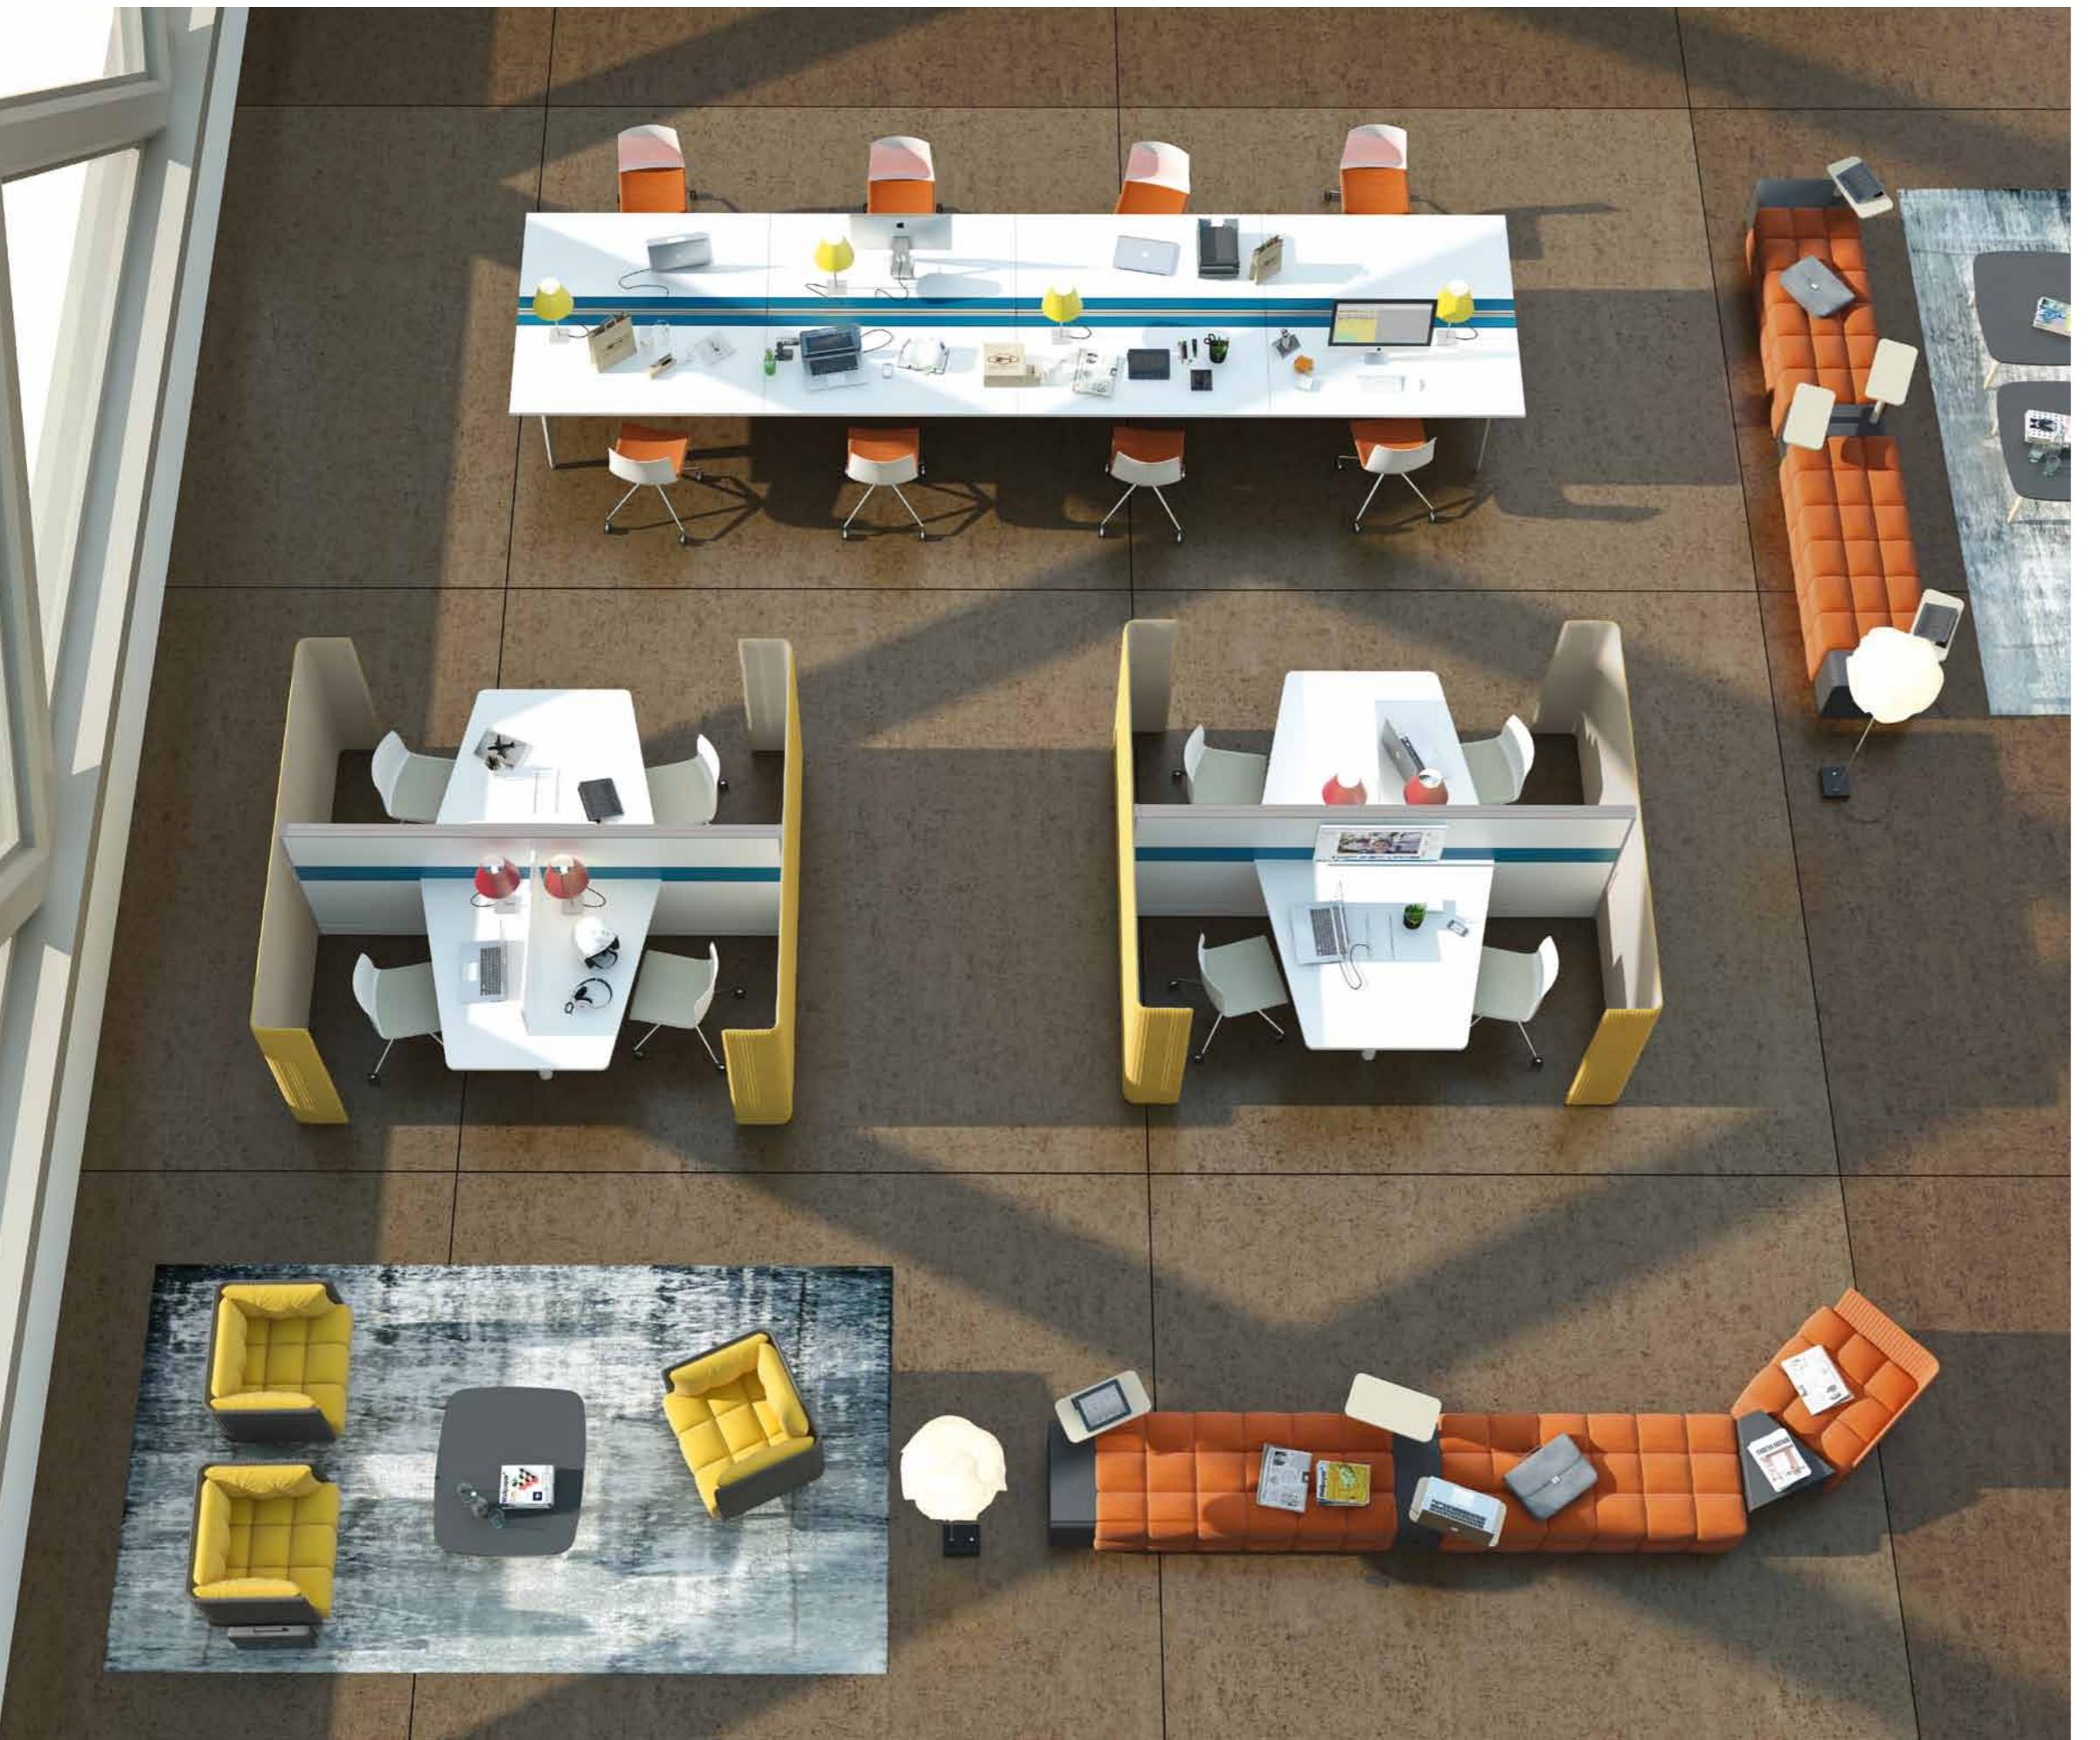

THE FUNCTIONALITY OF *podpartition*

POD è il sistema Martex dedicato alla creazione di spazi lavoro dove sia richiesta un'elevata concentrazione e aree di incontro e di comunicazione, separate visivamente ed acusticamente dall'open space. La struttura di POD è composta da una parete TE, con elettrificazione integrata, abbinata a pannelli realizzati in resina espansa e rivestiti di tessuto che possiedono sia un alto potere fonoassorbente, sia la resistenza al fuoco in classe 1.

POD est le système Martex dédié à la création d'espaces où les travaux nécessitant une grande concentration et salles de réunion-communication, séparés visuellement et acoustiquement de l'espace ouvert. La structure de la POD est composé d'une paroi TE, avec électrification intégrée, combinée avec des panneaux en résine élargi et rembourrage en tissus qui possèdent à la fois d'un fort pouvoir d'absorption du son et une résistance au feu en classe 1.

POD is the Martex system dedicated to creation of workplaces where it is required a high level of "focus" and meeting or communication areas provided with acoustic and view separation from the open space. POD's frame is composed by TE partition, with integrated electrification, in combination with panels realized in foam and upholstered in fabric with high sound-absorption characteristics and class 1 fire resistance.

podpartition & inattesa

socialize, team working & communication

Common areas may appear as spaces out from the intensive and routine work: reality is the opposite. Huddle rooms, activity rooms, multipurpose tables, coffee area, pods, war room, lounge areas are the new places of the contemporary office where the knowledge workers express themselves. They are informal areas, often with “home spirit” created to facilitate communication and interaction among people. Such places allow to overcome the hierarchical rules and foster spontaneous expression that frequently generates interesting original and alternate points of view.

Ad una analisi superficiale le aree comuni possono apparire come spazi sottratti al lavoro intensivo e routinario: la realtà è diametralmente opposta. Huddle room, activity rooms, multipurpose tables, coffee area, pods, war room e lounge areas sono i nuovi luoghi dell'ufficio contemporaneo dove si esprimono i knowledge worker. Sono aree informali, spesso con riferimenti “domestici” che nascono per favorire la comunicazione e l'interazione tra le persone. Questi, a volte, permettono di superare anche le regole gerarchiche e consentono una espressione libera e spontanea che, frequentemente, ha offerto spunti di riflessione che si sono rivelati originali ed alternativi.

Lors d'une analyse superficielle les zones communes peuvent apparaître comme des espaces soustraits au travail intensif et de routine: la réalité est diamétralement opposée. Salle Huddle, salles d'activités, tables polyvalentes, zone café, de dosettes, salle de la guerre et lounge sont les nouveaux lieux de bureau contemporain où le knowledge workers vont s'exprimer. Ces sont de zones informelles, souvent avec des références «domestique» nés pour favoriser la communication et l'interaction entre les gens. Ceux-ci, parfois, permettent de surmonter même les règles hiérarchiques et de permettre l'expression libre et spontanée qui, souvent, a fourni des points de réflexion originaux et alternatifs.

Composition suitable for individual work - with 2 opposed workstations and front screen - or for occasional meetings with wire managed meeting table, all in melamine white.

acoustic performances

UNI EN ISO 354:2003

61%
absorbing surface

The product has, at typical frequencies of speech (between 500 Hz and 2000 Hz), an average value of area of absorbance equivalent to approximately 4 m², that equals to about 61% of absorbance area than the total panel surface, having considerable advantages of reverberation time in the environment where it is installed.

Il prodotto presenta, nelle frequenze tipiche del parlato (tra i 500 Hz e i 2000 Hz) un valore medio di area di assorbimento equivalente pari a circa 4 m², che equivale a circa il 61% di area assorbente rispetto all'area totale del pannello, con notevoli vantaggi in termini di tempo di riverberazione all'interno dell'ambiente in cui verrà installato.

Aux fréquences moyennes (entre 500 Hz et 2000 Hz), le produit a un valeur moyenne de zone d'absorption équivalent d'environ 4 m², ce qui correspond à environ 61% de l'aire d'absorption par rapport à la surface totale du panneau, avec des avantages considérables en termes de temps de réverbération dans le lieu où il est installé.

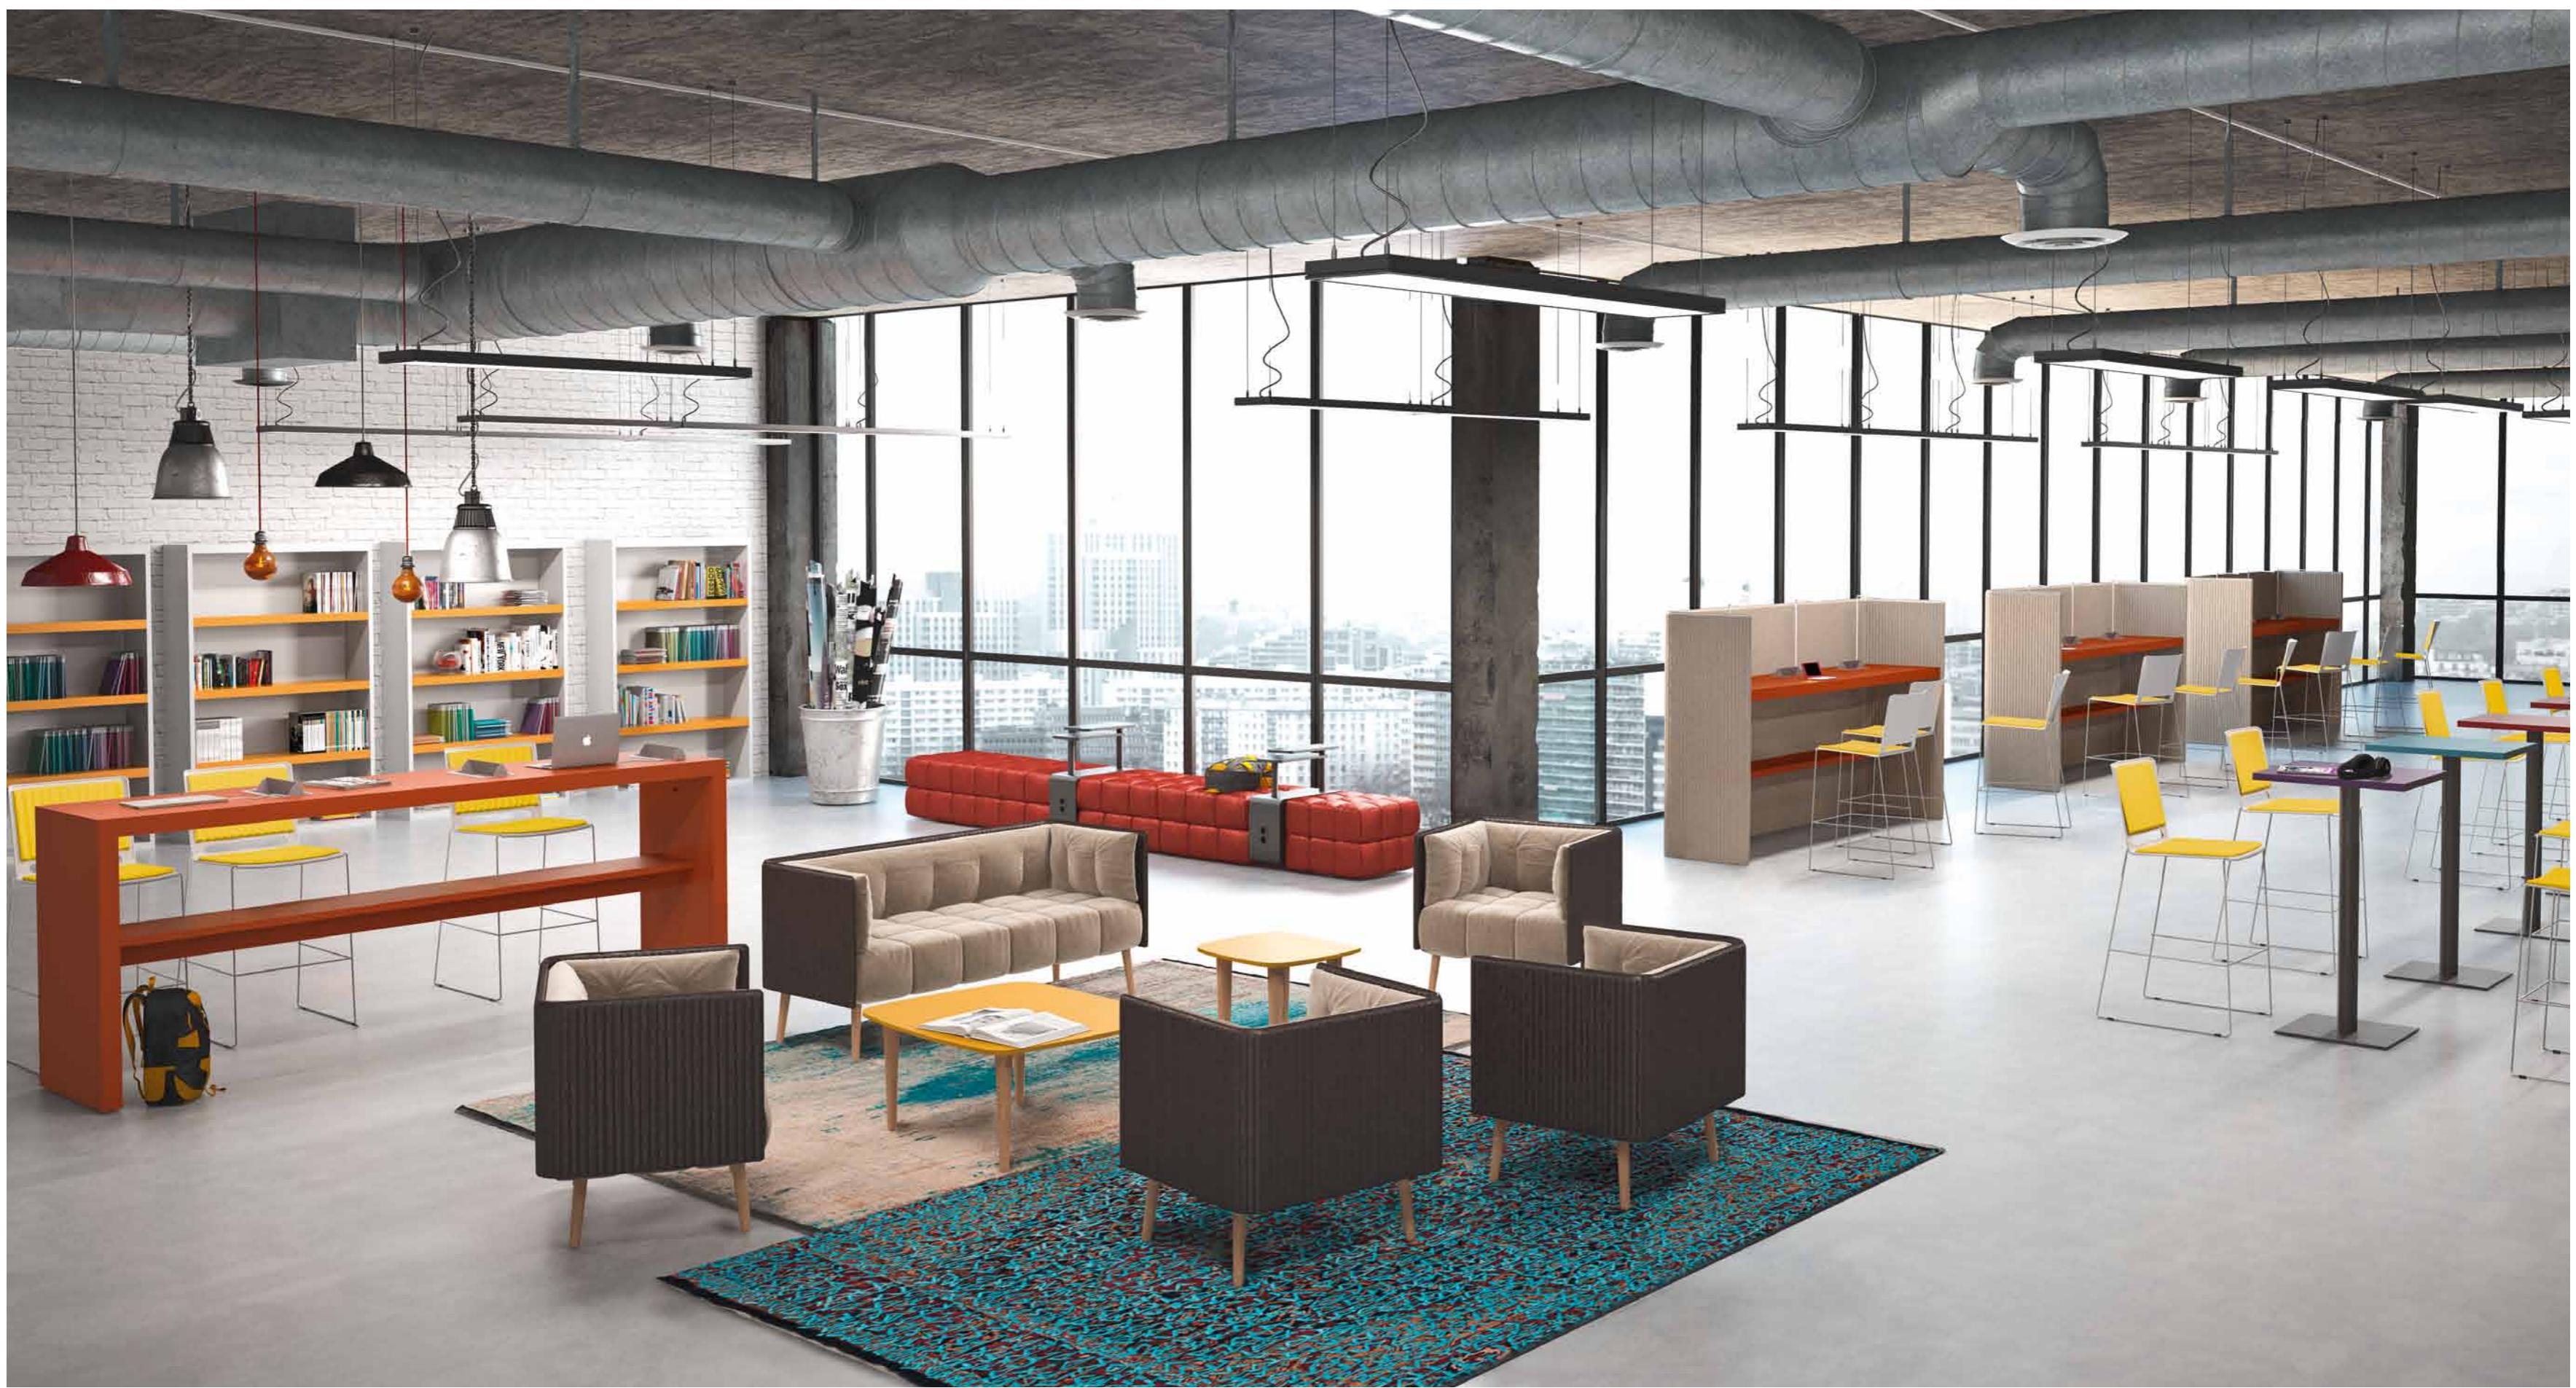

socialize areas & common spaces

Office is like a big city with its busy streets, the center always congested, the typical noise, while the common areas are like parks and gardens: a small oasis where people enjoy to meet and drink a coffee, talk freely or read something interesting because not everything happens on your desk and personal enrichment involves listening, dialogue and confrontation.

Un ufficio è come una grande città con le sue strade trafficate, il centro sempre congestionato, i suoi rumori - talvolta assordanti e le aree comuni sono come i suoi parchi e giardini: piccole oasi dove le persone si incontrano per bere un caffè, parlare liberamente o per leggere qualcosa di interessante perché non sempre tutto avviene sopra la propria scrivania e l'arricchimento personale passa attraverso l'ascolto, il dialogo ed il confronto.

Un bureau est comme une grande ville avec ses rues animées, le centre toujours congestionné, ses bruits parfois assourdissants et les espaces communs sont comme ses parcs et jardins: une petite oasis où les gens se réunissent pour boire un café, parler librement ou lire quelque chose d'intéressant parce que tout ne se passe dessus de votre bureau et l'enrichissement personnel passe par l'écoute, le dialogue et la confrontation.

internetpoint & romi

The Romi stools allow creating informal work areas or comfortable coffee break corners so to create pleasant zones dedicated to socialize.
* See Complements catalogue and pricelist.

Les tabourets Romi permettent la création du poste de travail informel ou des coins confortables pour la pause café; la création de zones agréables dédiés aux relations sociales de l'entreprise. * Voir le catalogue et tarif Complements.

sharingspace

socializetime

The aim of Martex is to improve the office environment by giving particular attention to employees' wellness through a creation of dynamic and creative "living spaces". In one place, we may find relax areas, spaces to share ideas, workplaces, and creative space or break areas.

L'obiettivo di Martex è quello di rendere migliore il luogo di lavoro, ponendo particolare attenzione al benessere dei dipendenti tramite la creazione di spazi "domestici", dinamici e creativi. In una stessa area troviamo aree relax, spazi per la condivisione delle idee, spazi di lavoro creativo e aree break.

Le but de Martex est de rendre meilleur le lieu de travail, en accordant une attention particulière au bien-être des employés avec la création des espaces «domestique», dynamique et créative. Dans la même zone, nous trouvons des espaces de détente, des espaces de partage des idées, des espaces de travail créatifs et les aires de repos.
