With central beam and bridge or Loop legs
Con trave centrale e gambe a ponte o Loop
Avec poutre central et piétements arche ou Loop

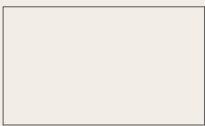

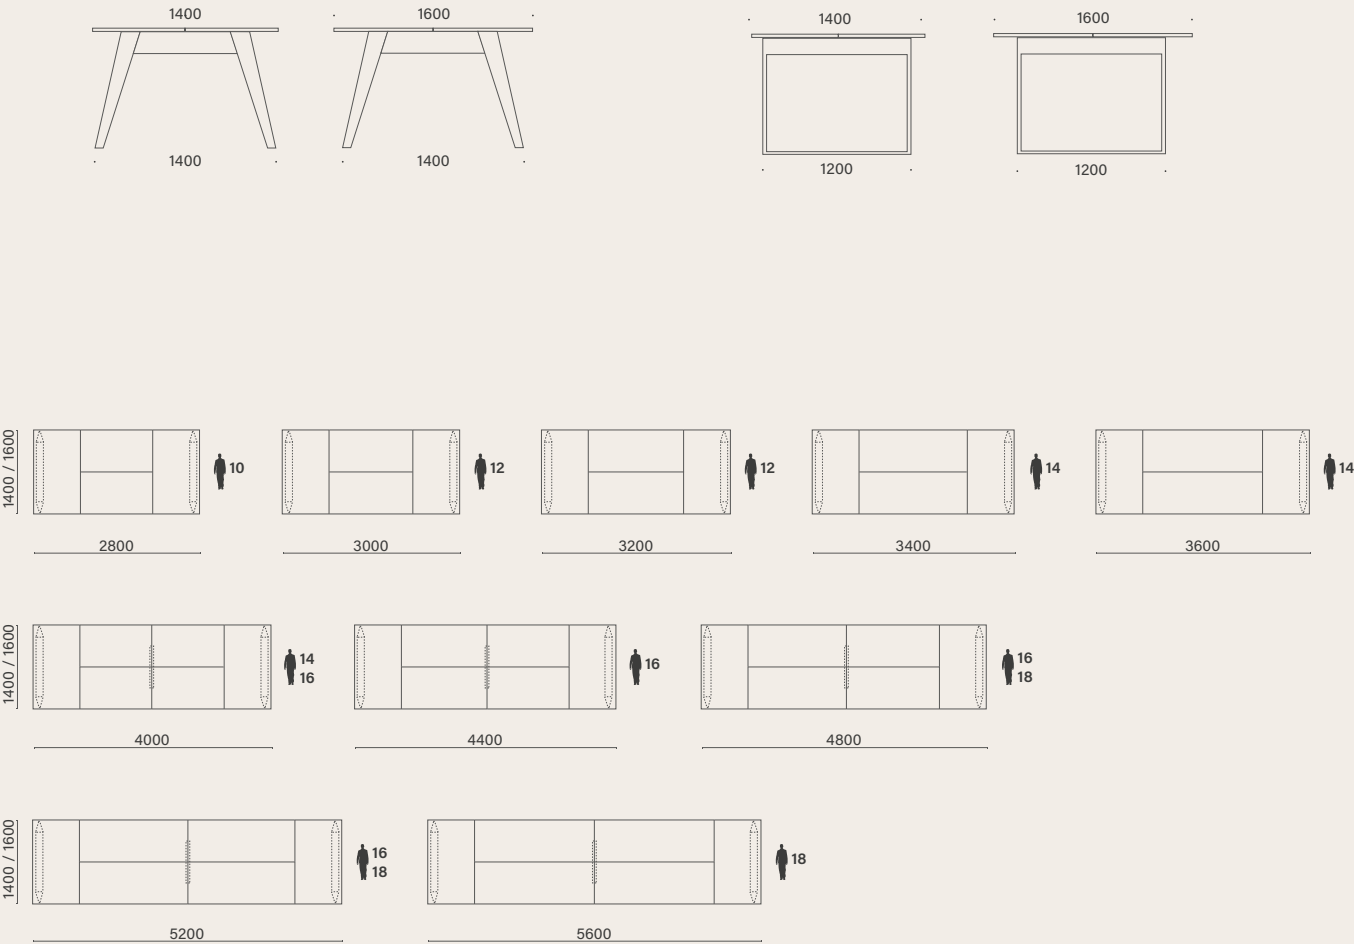

Structural central beam system allowing the connection of tops up to 3600 mm without intermediate legs. A clean and elegant solution offering outstanding legroom and seamless modularity.

Sistema con trave centrale portante che consente l'affiancamento di piani fino a 3600 mm di lunghezza senza gambe intermedie. Una soluzione essenziale ed elegante che garantisce grande libertà di movimento e massima continuità visiva.

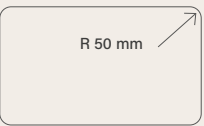

Système avec poutre centrale porteuse permettant le raccordement de plateaux jusqu'à 3600 mm sans pieds intermédiaires. Une solution sobre et élégante offrant une grande liberté de mouvement et une continuité parfaite.

with bridge legs | con gamba a ponte | avec piétements arche

STANDARD
Straight corners top
Piano angoli retti
Plateau avec angle droit

OPTIONAL
Rounded corners tops
Piano angoli arrotondati
Plateau à coins arrondis

TABLE DE RÉUNION ET SOCIAL

Without central beam and single Pigreco legs
Senza trave centrale e gamba singola Pigreco
Sans poutre central et pied individuel Pigreco

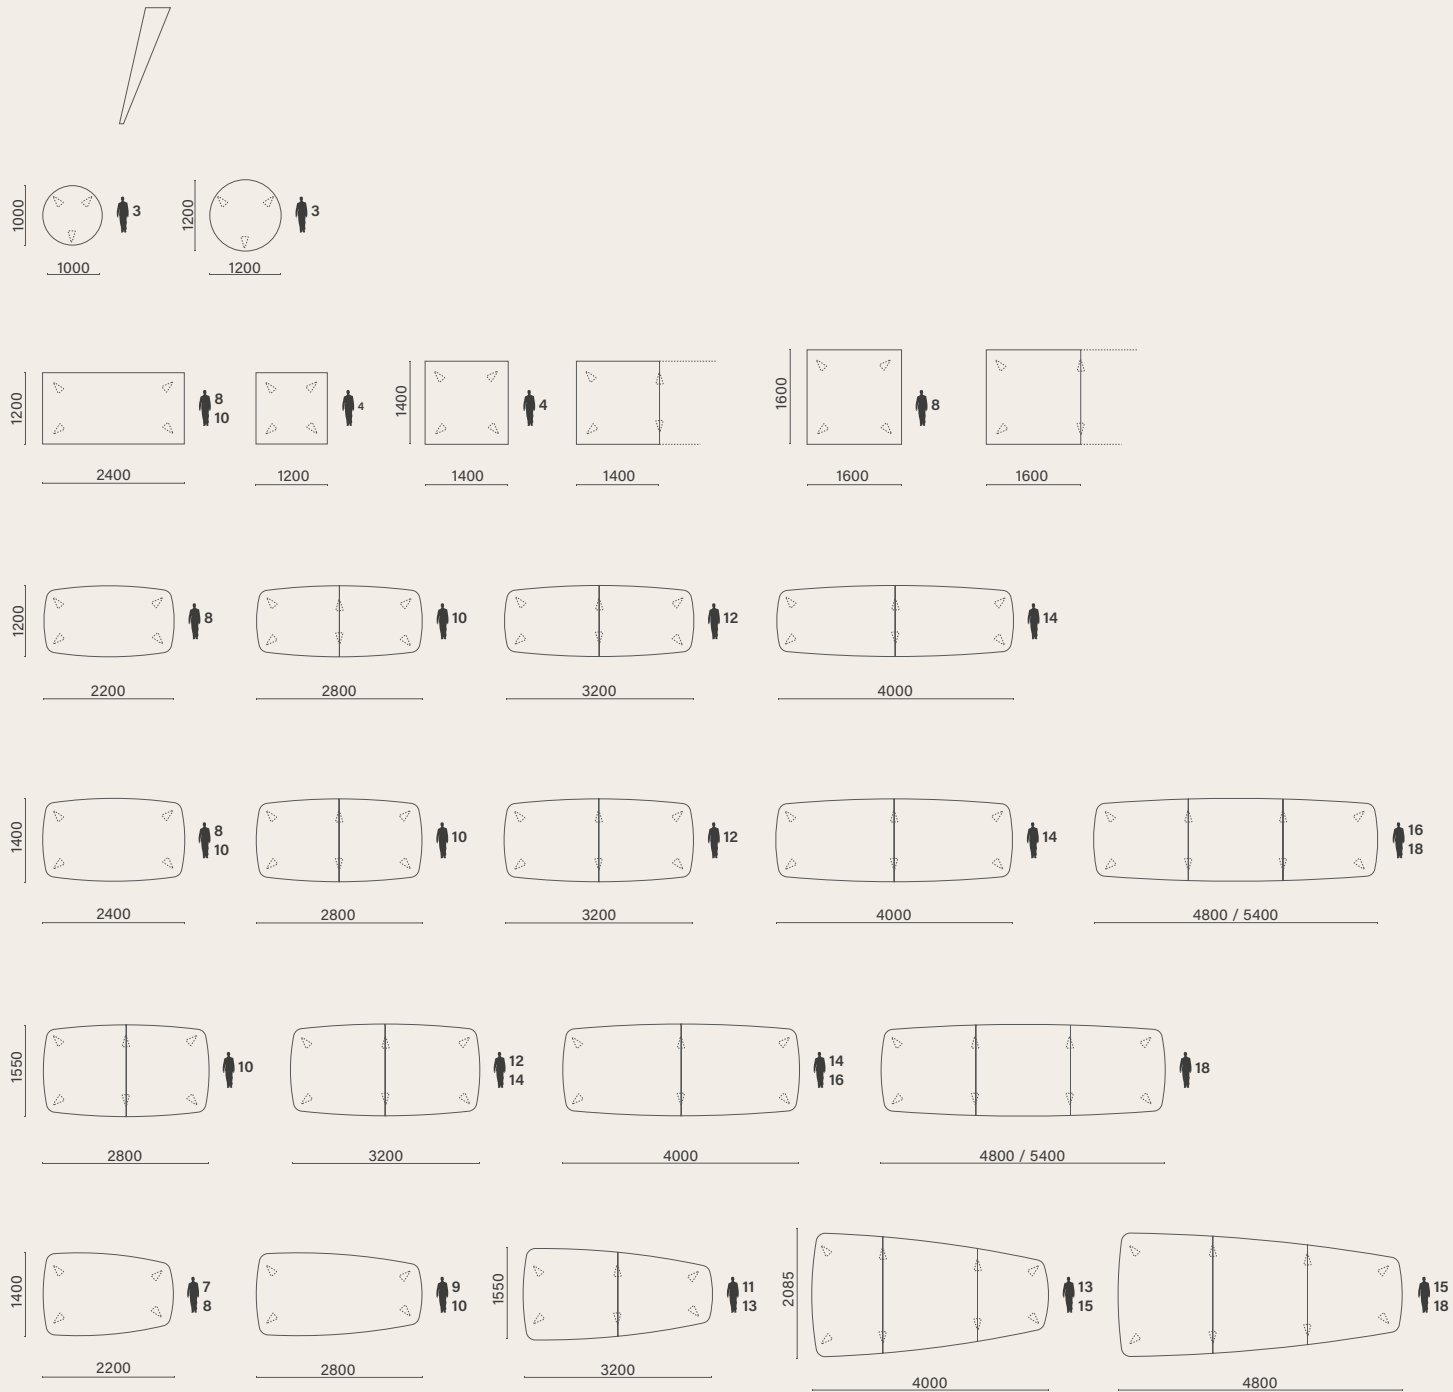

In bench configurations, central support is provided by either a Pigreco leg or an electrified leg for vertical cable routing. A functional solution that combines structural integrity and design.

Nelle configurazioni con piani affiancati, il supporto centrale è garantito da una gamba Pigreco o da una gamba elettrificata che consente anche la salita dei cavi.
Una scelta funzionale che unisce stabilità e design.

Dans les configurations avec plateaux juxtaposés, le support central est assuré par un pied Pigreco ou un pied électrifié permettant la montée des câbles.
Une solution fonctionnelle alliant stabilité et design.
